# NFT Development Pipeline WIP

**Custom Marketpace on Mintbase Libraries**

ongoing development →

- custom storefront running on Mintbase libraries etc
- ability to have our own style / brand
- ability to implement advanced features e.g. our own contracts and our own 3d gallerys

**Mintbase Storefront**

- basic storefront on mintbase
- ability to mint and sell NFT's on NEAR through the storefront
- limited manual methods for large scale editions
- limited royalty models

**Organisation Wallets**

- set up organisation wallets following best practices.

**App/API Integration**

- understand / leverage the ability to query the blockchain (or blockchain indexer) for resources / information for use in applications. NEAR / ARWEAVE

**Custom NFT Gallery**

- present NFT's in a custom 3d gallery in either / both of app based and web based galleries.

**Custom Contracts**

- use custom contracts built on RUST in the iSPARX NFT marketplace.

**ETC**
